2) Services Page (Software + Web Operations)

A) Website & Web App Development

We build fast, secure, modern websites and applications.

- Business websites, landing pages, portfolio sites
- Admin panels, dashboards, CRM modules
- E-commerce & custom order systems
- API integration (payment, SMS, ERP/CRM, etc.)

B) SEO & Growth Optimization

SEO that increases visibility and brings real traffic.

- Technical SEO audit & fixes
- On-page SEO (structure, content, schema)
- Speed optimization (Core Web Vitals)
- Keyword plan + monthly reporting

C) Web Assets Management

We manage the critical assets that keep your business online.

* Domain renewals & DNS configuration
* Hosting/VPS monitoring and backups
* SSL certificate setup and renewal
* Security hardening + uptime monitoring

D) Email Service Management

Reliable email delivery for your business.

* Business email setup (Google Workspace / Microsoft 365 / cPanel)
* SPF/DKIM/DMARC configuration
* Deliverability monitoring & troubleshooting
* Mailing list and transactional email setup (if needed)

E) Maintenance & Support

Stay updated, secure, and stable.

* Monthly maintenance packages
* Bug fixes, version upgrades
* Security patches & logs review
* Performance monitoring

---

3) Products & Projects Page (Dedicated Section)
